

Current Issues In Plant Molecular And Cellular Biology

Author : M Terzi R Cella A Falavigna / **Category :** Science /
Total Pages : 700 pages

 [Download Current Issues In Plant Molecular And Cellular Biology PDF](#)

Summary : Free current issues in plant molecular and cellular biology pdf download - plant cell and tissue culture is a relevant area of experimental biology that has been developed for some decades to become an indispensable tool of plant biotechnology progress in this area sometimes tumultuous has been regularly recorded by the proceedings of the congresses of the international association for plant tissue culture which have been held every four years in several continents this book reports plenary lectures keynote lectures and invited oral presentations given at the last congress held in florence it is a useful reference guide both for established scientists and students on both traditional and emerging fields of plant biology the following topics are covered in vitro culture and plant regeneration plant propagation haploids somatic hybridisation reproductive systems genetic variability gene transfer organelles biotechnology of tropical and subtropical species agronomic traits somatic embryogenesis meristems cell surface growth regulators reception and transduction of signals gene expression under extreme conditions primary metabolism secondary metabolism transport large scale production

Pusblisher : Springer on 1995-02-28 / **ISBN :** 0792333225
