**Summary :** Free globalization and the limits of national merger control laws pdf download - companies today pursue their goals with little regard for national borders however it remains true that business activity is regulated to a significant extent by each national jurisdiction this is particularly true of mergers as anyone knows who has ever been involved in a transnational merger in multiple jurisdictions the knottiest problems and issues arise from variations in national competition and merger laws this extremely valuable new book offers an in-depth proposal for an international merger control regime that is firmly grounded in and supported by a framework of economic and legal theory it arrives at its conclusions along three major avenues a study of the concepts of global public good and consumer welfare that underlie the progress of globalization detailed analyses of the two most important and highly developed merger law systems those of the european union and the united states and a systematic and comprehensive review of the major existing proposals both institutional and scholarly for an international merger control regime a special chapter is devoted the complex custodial role of the world trade organization both in its present activity and as it is envisioned in the various proposals globalization and the limits of national merger control laws takes a giant step toward breaking down one of the last and most intransigent barriers to global free trade it will be avidly studied and put to use by business lawyers and policymakers everywhere and will quickly take its place as a fundamental work for teachers and students of international trade and international relations
