Complex Interpolation Between Hilbert Banach And Operator Spaces

Author : Gilles Pisier / **Category :** Mathematics / **Total Pages :** 78 pages

[Download Complex Interpolation Between Hilbert Banach And Operator Spaces PDF](#)

Summary : Free complex interpolation between hilbert banach and operator spaces pdf download - motivated by a question of vincent lafforgue the author studies the banach spaces x satisfying the following property there is a function varepsilon to δ x varepsilon tending to zero with varepsilon 0 such that every operator t colon l_2 to l_2 with t le varepsilon that is simultaneously contractive i e of norm le 1 on l_1 and on l_∞ must be of norm le δ x varepsilon on l_2 x the author shows that δ x varepsilon in o varepsilon α for some α 0 iff x is isomorphic to a quotient of a subspace of an ultraproduct of θ -hilbertian spaces for some θ 0 see corollary 6 7 where θ -hilbertian is meant in a slightly more general sense than in the author s earlier paper 1979
