

**Spectroscopic Characterization
of Minerals and Their Surfaces**

Lelia M. Coyne, Editor

San Jose State University

Stephen W. S. McKeever, Editor

Illinois State University

David F. Blake, Editor

PAJIS—James Research Center

Developed from a symposium sponsored
by the Division of Geochemistry
at the 198th National Meeting
of the American Chemical Society,
Los Angeles, California,
September 29–30, 1988

American Chemical Society, Washington, DC 1990

Spectroscopic Characterization Of Minerals And Their Surfaces

Author :Lelia M Coyne S W S McKeever David F Blake
American Chemical Society Meeting / **Category** :Business & Economics / **Total Pages** : 480 pages

 [Download Spectroscopic Characterization Of Minerals And Their Surfaces PDF](#)

Summary : Free spectroscopic characterization of minerals and their surfaces pdf download - this volume provides an overview of the types of spectroscopic methods in current use for characterization of crystal structure chemistry morphology and excited states of minerals its 23 chapters cover topics such as the numerous means of mineral spectroscopy applied to the determination of composition purity interaction with energy characterization of active centers and adsorbate interactions it also addresses the structural and physical properties of minerals associated with chemical promotion of chemical reactions the storage of electronic energy in most naturally occurring minerals and spectroscopic means by which biologically deposited minerals can be distinguished from geologically deposited ones

Publisher : An American Chemical Society Publication on 1990 / **ISBN** : 0841217165
