

Supergenes What Really Makes Us Human

Author : Craig MacKay / **Category :** Science / **Total Pages :** 212 pages

 [Download Supergenes What Really Makes Us Human PDF](#)

Summary : Free supergenes what really makes us human pdf download - why do we behave so differently in different situations why did you choose the clothes you are wearing the books you read and the friends and opinions you have what is it about humans that has let us achieve so much so quickly this book tries to understand why the evolution of our human species is happening at a rate so much faster than may be explained by darwinian biological evolution alone the engine of our extraordinary social evolution is human behaviour we have a deep-seated need to pass on to others some part of our own achievements what we have made of our lives our survival and success now depends principally on our adaption to our social environment and not to our physical environment it is these supercharged social genes that are the essence of our remarkable and accelerating rate of evolution today this book looks critically at our present understanding of human behaviour and evolution to seek a consilience across a wide range of fields of research more at [www supergenes net](http://www.supergenes.net)
