Summary : Free european works councils and industrial relations pdf download - the creation of european works councils is arguably the most important measure taken in global industrial relations in recent years adopted with the primary goal of facilitating european-level workers participation in information-sharing and consultation in multinational companies ewcs have also been central to a wide-ranging process of institution-building at the european level european works councils charts the growth in the number of ewcs and the development of practices associated with ewcs between 1994 when legislation on ewcs was adopted and 2009 when the initial legislation was amended drawing on original large-scale survey data the book shows that the quality of information and consultation is generally poor thus bringing into question the soft touch legislative approach to employee participation of the european commission the reforms implemented within trade union organizations to accommodate the development of ewcs are explored together with the initiatives taken to extend the role of ewcs beyond information and consultation to incorporate negotiation articulation between ewcs and trade union organizations is shown to be integral to ewcs as institutions of information and consultation and as a means to influence managerial decision-making similarly the development of ewcs is shown to be a process contested by employers organizations and managers on the one hand and labour organizations on the other the character of this contestation ensures that the category ewc includes a wide range of institutional forms and practices
