Yeshayahu Ben-Aharon

**Summary :** Free the event in science history philosophy and art pdf download - in this book dr ben-aharon demonstrates how the transformation of human consciousness in modern times is expressed in the fields of science history philosophy and art he shows how creative concepts have been discovered and applied in physics biology genetics and artificial intelligence in the philosophy chapter ben-aharon traces the thought of deleuze and guattari foucault derrida badiou and levinas and shows that this radical thinking is no longer abstract theoretical reasoning or mere speculation rather it is an exercise in generating real cognitive and moral substance taking the human beyond the traditional boundaries of body subjectivity and identity the chapter on art demonstrates how contemporary artistic work joins together with science and thinking to create a new stream of real becoming and evolution the historical decision of our time is then are we going to apply this new creativity in social life or will we reverse it into its destructive opposite
