Summary : Free scepticism in the eighteenth century enlightenment lumi res aufkl rung pdf download - the age of enlightenment has often been portrayed as a dogmatic period on account of the veritable worship of reason and progress that characterized eighteenth century thinkers even today the philosophes are considered to have been completely dominated in their thinking by an optimism that leads to dogmatism and ultimately rationalism however on closer inspection such a conception seems untenable not only after careful study of the impact of scepticism on numerous intellectual domains in the period but also as a result of a better understanding of the character of the enlightenment as giorgio tonelli has rightly observed the enlightenment was indeed the age of reason but one of the main tasks assigned to reason in that age was to set its own boundaries thus given the growing number of works devoted to the scepticism of enlightenment thinkers historians of philosophy have become increasingly aware of the role played by scepticism in the eighteenth century even in those places once thought to be most given to dogmatism especially germany nevertheless the deficiencies of current studies of enlightenment scepticism are undeniable in taking up this question in particular the present volume which is entirely devoted to the scepticism of the enlightenment in both its historical and geographical dimensions seeks to provide readers with a revaluation of the alleged decline of scepticism at the same time it attempts to resituate the pyrrhonian heritage within its larger context and to recapture the fundamental issues at stake the aim is to construct an alternative conception of enlightenment philosophy by means of philosophical modernity itself whose initial stages can be found herein
